To be implemented from Academic Year 2023-2024

Title of the Programme: S.Y.B.A.(History)**Preamble**

History, as we all know, is a vital source to obtain knowledge about a nation's soul. Of late, this has been argued and established that there can't be a nation without a past. Today, more than ever before, the challenges of globalization obligate historians and researchers to go beyond the local, national, and even continental frontiers of their knowledge. However, competing and keeping pace with the ever expanding horizon of history, one has to be sensitive in understanding the issues of nations history on larger canvas, absorbing polemics and not only create a belief of continuity by exploring nation's past, which lie in abundance. This certainly will further a dialog between past and present and a new narrative may emerge. At the outset, it may well be stated that this draft document owes its origin to meet the fundamental challenges of ever changing academics scales at Global level. Thus, a high priority task in the context of future education development agenda in India is fostering quality higher education. The idea is to involve young minds in knowledge production and of greater participation of knowledge itself. Participation in knowledge, by young minds, is an important departure from the existing structure at undergraduate level. Implementation of new structure is based on guiding principles of LOCF. To clarify the issue, it's vital to quote a prudent part of Learning Outcome based Curriculum Framework (LoCF) for under graduate education. The fundamental premise underlying the learning outcome based approach to curriculum planning and development is that higher education qualifications such as Bachelor's Degree Programme are awarded on the basis of demonstrated achievement of outcomes (expressed in terms of knowledge, understanding, skills, attitudes and values) and academic standards expected of graduates of a programme of study. Empiricism suggests that mere reproduction of knowledge in a classroom has lost its relevance in the rapidly changing global requirements. A young mind at the graduate level cannot be treated like an empty vessel. Instead the object in the class room shall be encouraged to participate in the exchange of ideas leading to develop the cognitive functioning rather than still with corny. It is with this assumption, the curriculum under LoCF is designed, to reiterate, as a guiding principle only, as justice to the glorious past and vast canvas of Indian History can only be done by providing the much needed space at micro and macro levels. Historical facts are not static since new discoveries are constantly thrown up by archeology, generics, climate sciences and so on. As with all fields of knowledge, existing

hypotheses need to be tested. This interaction should be the centre of discussion in a pro active classroom, which in turn can produce a researcher with an inquisitive and scientific temperament. As of late, quoting authority is seen as more important than primary material. The disdain for facts, in 5 turn, has discouraged the systematic collation of primary evidence. Quite apart from removing major distortions, it will have two important benefits. First, it will make history more about exploration and discovery than about memorizing a static narrative. Second, it will give Indians a feeling of ownership over their own history with a broader worldview. Static classrooms need to be swapped for a more interactive one for fulfilling this purpose. Spirit of the draft LOCF is focused on this issue, as it states clearly” a sense of inquiry and capability for asking relevant/appropriate questions, problematizing, synthesizing and articulating; ability to recognize cause and effect relationships, define problems, formulate hypotheses, test hypotheses, analyze interpret and draw conclusions from data, establish hypotheses, predict cause and effect relationship: ability to plan execute and report the results of an experiment or investigation”. History is fragmentary by nature. It focuses on aspects or parts of an event, but not entirely. Despite the incessant efforts of a historian, it is impossible for him to capture everything about his choice of study. Availability of evidence, its reliability and consistency, available time and the objectives of the study shape his selection and utilization of sources and evidence. This may be a defining line for a historian, but cannot be a defining line for history of a nation, specifically like ours, which needs to be presented in totality rather than in any ‘centric’ form. It must be an organized critical study of such past activities of human beings as had produced significant effects on subsequent course of events in each part of the nation. Indeed, the main difficulty facing the historian and the history as a whole is not eliminating unanswerable or unimportant questions but choosing the important ones. A historian’s choice of study is determined by personal values, concerns of those who support his work, the nature of the age in which he lives, or by a combination of the aforesaid. Significantly, the ways in which these influences operate are complex, and the historian himself is often unaware of them. Present curriculum guideline is an endeavor in this direction, as it focuses on introducing Nation’s history on wider perspective at graduate level through core papers rather than comprehending the vast regions as ephemeral notions. The problems and issues pertaining to historical knowledge is one of the core issues in designing a curriculum of history. The problems of knowledge in history are basically epistemological. To be sure, epistemology or the theory of knowledge is that branch of philosophy which concerned with the nature and scope of knowledge, its presuppositions and basis, the general reliability of claim to knowledge. A major challenge for the curriculum

designing is how to deal approach. This method established the procedures and categories used by practicing historians in handling and understanding their material. This has led to a discussion of the ways in which historians divide up and classify the past, the manner in which they argue for and substantiate their interpretation, and the logical structure of the explanations they offer. Clearly, this new method of enquiry is very useful in finding and brick building 6 evidences. His will also enable historians to make credible claims to their statements about the past. Thus, understanding the past in its nature and totality is a prime prerequisite for a future researcher. In contemporary times, a shift from World History to Global History is at the centre of debate in western academic circles, I other parts de constructionist debates are still on, Oriental Occidental clash of ideas and construction of history itself has in one way enlarged the scholarly domains, but on other hand polemics have also surfaced. In the midst of such scholarly activities future generation needs not only communicative exposure in the classroom but his/her mental facilities require a departure from semantic to self-conscious. Issue of self-conscious may have variables, one is such understanding and positioning of self in world order. In this positioning process colonial and post-colonial debates have largely focused upon dialectics of certain angle. Thus, it seems necessary to introduce resurgence of Asian civilizations at the undergraduate level as a compulsory paper to shape the mental faculty of the student for better understanding of world order. As per changing times, the other core papers have also been remodelled with introduction of a newspaper like 'Cultural heritage of India' and 'History of Communication and Media' with a view to develop skill at undergraduate level as per spirit and design of LoCF guidelines. A serious remodelling of medieval period has been done that covers larger portions of India for a better understanding of Nation history. A historian is essentially trained to be objective in his selection, analysis and interpretation of evidence. This curriculum is an attempt to a customize the student to larger levels of Indian, Asian and World History which can broaden the arena of young minds and also bring a mark shift in the pedagogy.

Justifications:

- **CO1 and PO1:** CO1 aligns with PO1 by focusing on the consolidation and expansion of Maratha power, a significant historical event, contributing to students' scientific understanding of historical developments.
- **CO3 and PO3:** CO3 connects with PO3 as it involves the analysis of Maratha power during the Peshwa period and the causes and consequences of the Third Battle of Panipat, requiring students to use historical research methods to study this historical period.
- **CO7 and PO7:** CO7 relates to PO7 as it includes insights into administration and society during the Peshwa period, aligning with the understanding of the subject for competitive examinations, which is essential for students.
- **CO4 and PO4:** CO4 aligns with PO4 by studying the reasons behind the defeat of the Marathas in the Third Battle of Panipat and examining the historical context, which is crucial for students to construct original historical arguments based on primary source material.

- **CO5 and PO5:** CO5 connects with PO5 as it covers the post-Panipat period and the revival of Maratha power under Peshwa Madhavrao I, which requires students to apply appropriate methods and techniques for the generation and dissemination of historical knowledge.
- **CO2 and PO2:** CO2 aligns with PO2 as it examines the rise of the Peshwas, focusing on their political and economic systems, contributing to students' logical understanding of historical events and their societal implications.
- **CO6 and PO6:** CO6 relates to PO6 as it fosters knowledge of the factors contributing to the downfall of Maratha power and how they are connected to the societal, cultural, and economic conditions, enabling students to apply reasoning informed by contextual knowledge to assess the state of society and economy during that era.
