

Certificate Course on Stock Market Analysis

Course Credits: 2

Course Objectives:

1. To provide an understanding of the structure and functioning of financial markets, focusing on money and capital markets.
2. To introduce the history and development of stock markets in India and globally.
3. To explain the functions of stock markets and their significance in the economy.
4. To familiarize students with the concepts of primary and secondary markets, including regulatory bodies like SEBI and stock exchanges like NSE and BSE.
5. To equip students with practical knowledge of investment tools, such as dematerialized accounts and trading platforms.
6. To introduce key stock market indices (NIFTY, SENSEX) and their importance for tracking market performance.
7. To develop the skills needed for intelligent investing, including risk management and stock selection for long-term growth.

Course Outcomes:

1. Students will understand the key elements of financial markets, distinguishing between money and capital markets.
2. Students will be familiar with the history of stock markets and the role of regulatory bodies like SEBI.
3. Students will grasp the essential functions of stock markets, including capital formation, price discovery, and liquidity.
4. Students will understand the differences between primary and secondary markets, and how stock exchanges operate.
5. Students will be able to open and manage dematerialized and trading accounts, and navigate brokerage platforms.
6. Students will gain practical knowledge of buying and selling stocks, using market tools and adhering to SEBI regulations.
7. Students will develop the ability to assess risks, apply golden rules of investment, and identify stocks with high growth potential for better investment decisions.
