

To,
The Principal,
Tuljaram Chaturchand College,
Baramati, Maharashtra.

Subject: Request for Permission to Organize a Plastic Collection Drive at Manapavasti

Respected Sir/Madam,

The Department of Economics, in collaboration with the Manapavasti Grampanchayat, proposes to organize a Plastic Collection Drive under the theme of "Clean Village" at Manapavasti on Tuesday, October 1, 2019.

The objective of this initiative is to raise awareness about the harmful effects of plastic pollution and to encourage sustainable waste management practices in the community. Faculty members and students from the Department of Economics will actively participate in this drive to promote environmental cleanliness and responsibility.

We kindly request your permission to conduct this event and extend the college's support for this collaborative initiative. Necessary preparations and arrangements will be made to ensure the drive is executed smoothly and effectively.

Your approval will greatly encourage us to contribute to this community welfare activity and make it a success.

Thanking you in advance for your support.

Yours sincerely,

Activity Report: Awareness Program on Collection of Plastic at Manapavasti Baramti.

Date:01-10-2019

Organized by:

Tuljaram Chaturchand College of Arts, Science, and Commerce, Department of Economics, on 1st October 2019, in collaboration with the local authorities and villagers of Manapa vasti, Baramati, Pune.

Program Overview:

The Department of Economics at Tuljaram Chaturchand College organized an awareness program on the collection and disposal of plastic waste at Manapavasti on 1st October 2019. The initiative aimed to educate the villagers about the environmental hazards of plastic pollution and the importance of responsible plastic waste management. The program emphasized how reducing plastic waste can help preserve the environment, promote sustainable living, and contribute to a cleaner, healthier community.

Participation and Impact:

The awareness program was attended by 17 students from the Department of Economics, who were actively involved in organizing and facilitating the sessions. In addition, 25 villagers from Manapa Vasti participated in the program as beneficiaries. The students delivered presentations, conducted discussions, and interacted with the villagers, helping them understand the significance of plastic waste collection and the environmental issues associated with plastic pollution.

Outcomes:

The program resulted in several positive outcomes:

1. **Increased Awareness of Plastic Pollution:** The villagers gained a deeper understanding of the environmental impact of plastic pollution and the importance of responsible plastic waste management.
2. **Promotion of Recycling and Waste Segregation:** The program successfully introduced the concepts of waste segregation and recycling to the villagers, empowering them to take action at the household level.
3. **Behavioral Change:** Many participants committed to reducing their use of plastic and started practicing waste segregation, which can contribute to a cleaner, healthier environment in the village.
4. **Community Engagement:** The villagers were encouraged to actively participate in plastic waste collection, and the program fostered a sense of shared responsibility for the cleanliness of the community.
5. **Sustainable Practices:** The program helped the community understand the importance of sustainable living and the long-term benefits of reducing plastic consumption.

The program not only raised awareness but also motivated the villagers to take immediate action by adopting waste management practices, which will contribute to reducing plastic waste in the long run.
