

Anekant Education Society's  
**Tuljaram Chaturchand College of Arts, Science and Commerce, Baramati**  
**Department of Zoology**  
organised

**One Day State Level Webinar**  
**on the occasion of "National Bird Week"**  
date-10<sup>th</sup> November 2020

The screenshot shows a YouTube live stream interface. The video player displays a slide titled "Types of endemism" with two points:

- a) Neo-endemism: A taxon is evolutionary young and not yet spread over the new area - White-bellied Shortwing (endemic to southern Western Ghats), Amboli Toad, Koyana Toad, Narcondam Hornbill
- b) Palaeo-endemism (Epiotics, Relics): The taxon is restricted now but once it was widely distributed. The restriction of species in a pocket is due to physical barrier like deserts, mountain, sea, etc. or change in climate, habitat or soil type etc. - Indian Rhinoceros, Asiatic Lion, Great Indian Bustard

The video player shows a progress bar at 40:08 / 1:42:35. Below the video, the title is "Zoology - Endemic Birds of Northern Western Ghats of India - 10 Nov. @ 2:00P" and it has 274 views. To the right, the "Top chat replay" section shows several chat messages, including "Good Afternoon Everyone.", "Good Afternoon", and "good afternoon".
