Subject: Sanction letter of Research Project on "To Study the Antimicrobial Activity of New Formulation prepared from Aloe Vera extract"

Respected sir,

We are pleased to inform you that the research project proposal entitled "To Study the Antimicrobial Activity of New Formulation prepared from Aloe Vera extract" has been sanctioned for duration of six months. This project aims to explore and evaluate the antimicrobial properties of a novel formulation of Aloe Vera, which holds promise for potential applications in the field of microbiology.

Principal Investigator: Mrs Komal Ramchandra Jagtap
(Assistant Professor, Department of Microbiology)

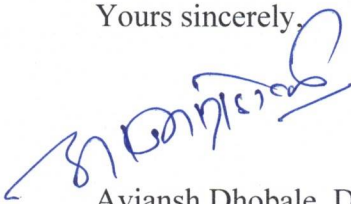

Coinvestigator: Dr. Yogini Ramkrishna Mulay
(Professor, Department of Microbiology)

The research project has been granted approval under the following terms and conditions:

- **Project Duration:** The approved duration for this research is six months, starting from 25/9/21 to 25/2/2022
- **Budget:** The total budget allocated for this project is 20000/-, which shall be disbursed in accordance with the institution's financial policies.
- **Research Protocol:** The research must be conducted following the approved protocol and ethical guidelines. Any modifications to the research plan must receive prior approval from the appropriate committee.
- **Progress Reports:** Final report to be submitted upon completion of the project.
- **Intellectual Property:** Any intellectual property generated during the course of this research shall be governed by the institution's intellectual property policy.

Please ensure that all research activities comply with the institution's policies and regulatory requirements. We wish you success in your research endeavours and look forward to the outcomes of this study.

Yours sincerely,

Aviansh Dhobale, Director
Mangalam Agrotech
