						popped and puffed snacks	any disorder in fresh commodities. PO6: Use of Modern Tools: - Operate modern tools, equipment, instruments and laboratory techniques to perform the experiments and write the programs in different languages.
	FP-12	Bake ry and Conf ectio nery Tech nolog y	-	-	-	preparation methods of bread, cake, biscuits, cookies, pastry, buns, crackers, types of quick bread, chocolate manufacture	CO1: Students will have a thorough understanding the processing and preservation of appetizers. PO1: Disciplinary Knowledge - Understand the basic concepts, fundamental principles and experimental findings and the scientific the ories related to food technology, food science and Food technology & engineering and its other fields related to the program. CO2: Students will have a thorough understanding on effect of blending and baking on final product of bakery. PO6: Use of Modern Tools:- Operatemoderntools,equipm ent,instrumentsandlaborator ytechniquesto perform the experiments and write the programs in different languages. CO3: The students will know the various extruded product development. PO7: Research Skills:- Understand how to design, collect, analyze, interpret and evaluate information/data that is relevant to food technology.

Cycle IV

2019 - 2024

							PO4: Analytical Reasoning and Problem Solving- To enable the students with good scientific and engineering knowledge so as to comprehend, design, and create food products and devices for the food industry and provide solutions for the challenges in the food industry as well as in agriculture.
	FP-7	Processing of Fruits, Vegetables and Plantation Crops	Drying, utilization of Fruit and Vegetable waste	Quality Control in Food Processing Industry,	utilization of Fruit and Vegetable waste	Osmotic dehydration, canning, freezing	CO1: Students will have a thorough understanding of various food processing techniques. PO8: Application of Knowledge: - Develop a scientific outlook and apply the knowledge with respect to food technology. CO2: The students will know the importance of various preservation techniques. PO1: Disciplinary Knowledge - Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and Food technology & engineering and its other fields related to the program.
	FP-10	Processing of Cereals, Pulses and	Milling of cereal & pulses, Extraction	-	Milling of cereal & pulses, Extraction	Processing of hot serve cereals and ready-to-eat breakfast cereals, Flakes, shreds,	CO1: Students will have a thorough understanding the unit operations followed for raw form to an edible form of cereals and legumes. PO8: Application of Knowledge: - Develop a scientific outlook and apply
